 Accreditation Council for International Olympiads (ACFIO)
 & World Genius Council (WGC)

School Empowerment Program – SEP

SCHOOL EMPOWERMENT PROGRAM - SEP

School Empowerment Program - SEP can be used as the right Professional Development tool for Students and Teachers. Deploying SEP accelerates credible improvement among students and teachers in a short span of time.

 Please note that SEP won't impose any financial burden on schools but on its implementation, your school gains immensely on credibility, reputation and finance.

SEP comprises of various elements – Hybrid Open Test, Master Question, Locate Mistakes and Framing Questions. These ingredients are introduced through SCORE BANK as detailed below.

SCORE BANK THE STUDENTS' BANK

Score Bank is the student's Bank developed using all the banking concepts but purely related to the learning process. SCORE BANK is a joint initiative of Accreditation

Council for International Olympiads (ACFIO) and World Genius Council (WGC). School Empowerment Program will be offered through SCORE BANK. The School will be the banker with students' accounts. As the students score in various assessment tools, their accounts are credited with the respective scores.

HYBRID OPEN TEST : HOT POT

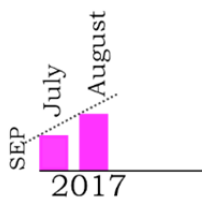

HOT POT - Hybrid Open Test; Power of Thought is designed as Monthly Open Book Tests (OBT) for Class 1 to 10 with questions from Mathematics and Science.

These OBTs will be distributed to students by the first week of every month and they need to submit their answers by the last week of the same month. The topics of Mathematics and Science of the respective classes are combined together (subject wise) into 10 sets of Hybrid Open Tests for the entire academic year.

Available to	Class 1 to 10
Delivery	Through SCORE BANK Schools
Frequency	5 th of every month
Commencing from:	1st June, 2017

All the questions will maintain the level and syllabus of the respective classes.

The Hybrid Open Test Pattern

We have taken a psychological approach to present the HOT POT Questions. The questions are presented through

friendly characters - Hypatia, Vidya, Wisden, Tony, Afreen and their friends. Hence the test takers are set to become the friends of these characters!

To answer the HOT POT Questions, students can use their own books, libraries; discuss it with their parents, teachers and friends or even try to Google it out. They will get 15 to 20 days to do the same.

Approach & Analysis

Our approach will encourage students to gather maximum information and knowledge by searching the answers for HOT POT. Though some questions are kept easy, at least 50% questions need real efforts. At the same time we have used the required psychological boosters too to keep high interest in the subject.

HOT POT injects deeper subject knowledge. Teachers can gather more knowledge on how daily life activities are connected to the subjects. HOT POT can be used as a Formative Assessment tool too.

MQuest! - THE MASTER QUESTION!

MQuest! is the single Master question generated from every topic in Mathematics and Science for Grade 3

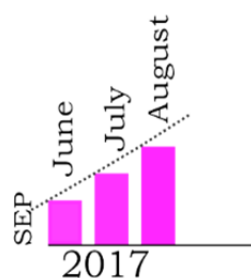

to 10. The Master Question is prepared squeezing all the parameters of a topic into just one Question!

MQuest! acts like a vaccine. After solving MQuest!, the student can solve any tough question from that topic.

Syllabus	Mathematics & Science of the respective class
Available to	Class 3 to 10
Frequency	Separate MQuest! for every topic
Commencing from	1st June, 2017

MQuest! is introduced through the Schools registered for WGSE 2018. The hints and various methods to solve the Master Questions will be given to the Teachers. Teachers can go through the clues of these Master questions before they give it to the students.

Subject Mastery for Teachers & High Caliber for Students

Using MQuest! the teacher and the student can gain mastery over the topic. The teacher becomes an expert in the subject due to the interaction with students by

giving indirect clues to them and their counter questions.

We assure rapid improvement among students in their grasping skills and performance.

We are happy to state that the teachers dealing with MQuest! and other elements of SEP need not attend any teacher training programs

to refresh themselves for the latest-
The crowd will follow them!

My Stick for Mistake

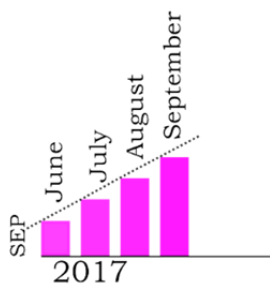

Parents used to complain the teachers that their children could solve the questions rightly at home but make mistakes during exams. To make sure that they won't repeat the mistake, parents used to give more questions to solve. This creates monotonous attitude among children.

Considering these psychological issues, SCORE BANK has devised 'My Stick for Mistake' to address it.

Syllabus	Mathematics & Science of the respective class
Available to	Class 1 to 10
Frequency	Separate My Stick for every topic
Commencing from	1st June, 2017

Short Cut to Comfortable Success

Here is how – Vidya is solving a question given by her teacher. While solving it step by step, she is making mistakes.

Now, we will give Vidya's question and her wrong solution to our students in order to identify where she went wrong. When children

locate the mistake correctly, they won't make such mistakes while solving the questions. This is a psychological approach proven for its right success. The student becomes

an examiner to correct his/her mistake.

Let us allow them to make NEW mistakes as they won't repeat the SAME mistake!

Pat for The Teacher

When the Teacher is using 'My Stick for Mistake' to correct a student, the teacher saves the student's time and efforts. Further, the teacher is developing an easy and shortcut route for deeper understanding and boosting the student's interest in the subject.

We appreciate the teacher and the teacher deserves a pat for engaging students with the subject in right spirit.

FTrick? FRAME YOUR QUESTION

FTrick? is the newly invented Formative Assessment tool to ensure that the student has in depth knowledge of the topic and the student has the potential to become a genius.

Syllabus	Mathematics & Science of the respective class
Available to	Class 3 to 10
Frequency	Separate MQuest! for every topic
Commencing from	1st June, 2017

Mutual Checkmate & Dynamic Evaluation

After administering HOTPOT, MQuest! and 'My Stick for Mistake'; FTrick? is given to students as homework. Under FTrick?, each student will be asked to frame a question using all the 4 different parameters given to them and its

explanatory answer. Each student has to prepare their own question. They may use the help of their parents or others.

The students should submit the questions they have prepared to the respective teachers after 5 days. The teacher should ensure that the question submitted by each student is different and they have used all the given parameters effectively.

Using FTrick?, teacher can ensure that the student has mastery over the topic. If there are 40 students in a class, the teacher will be getting 40 different questions prepared on the given 4 different parameters taken together. As the students gain mastery over the topic, teachers can sharpen their skill sets by right evaluation.

Right Rewards for Inspired Teachers from us

Wait! Teachers can select 5 good questions and its answers from each FTrick? Set/collection and send to us.

SCORE BANK's Dept. of Academic Excellence (DAE) will grade such questions and give credits to teachers

depends on the grade of each question. This credits can be converted to cash (any currency) at any time after the total number of credits cross 5000.

Enjoy intellectual enrichment, forever!

ALL IN ONE PACK - SEP FEE

Introductory offer to Associate Schools

SEP is the simple yet sharpest tool to extract quality results in short span of time. It is kept open to schools for a month to realize and enjoy its quality. Schools may use the SCORE BANK SEP facility thereafter by registering students for WGSE 2018.

Schools In India : Schools need to pay Rs. 500 per student when Rs. 800 may be collected from the student. Rs. 300 can be treated as administrative expenses for the school.

Schools situated outside India:

Schools need to pay USD 12 per student when USD 20 may be collected from the student. USD 8 may be treated as administrative expenses for the school.
